REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-4 and 6-19 are allowable because the prior art fails to teach or suggest a circuit (such as figure 3) having a two stage matching circuit (26) directly connected between pair of the amplifying elements adjacent to each other, wherein the two-stage matching circuit comprises a high pass filter type matching unit, having a parallel inductor and serial capacitor, formed only in a single stage; and a low pass filter type matching unit formed only in a single stage.

Claims 21 and 22 are allowable because the prior art fails to teach or suggest an amplifier circuit (such as figure 3) consists of one-stage high pass filter type matching unit and one-stage low pass filter type matching unit.

Claims 22-25 are allowable because the prior art fails to teach or suggest the two stage matching circuit comprising a high-pass filter type matching unit having only parallel inductor and a serial capacitor, thereby forming a first stage; and a low pass filter type matching unit having only a serial inductor and a parallel capacitor, thereby forming a second stage.

Claims 26-29 are allowable because the prior art fails to teach or suggest the matching circuit consists of one-stage high pass filter type matching unit having a parallel inductor and serial capacitor; and a one stage low-pass filter type matching unit having a serial inductor and a parallel inductor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
